

NOTICE

WATER QUALITY ADVISORY

The Town of Osoyoos is issuing a **Water Quality Advisory for elevated manganese levels** affecting all users connected to the Town water system. The advisory remains in effect until further notice.

Who may need additional protection from manganese?

- Infants and young children
- People wishing to seek additional protection

What is a Water Quality Advisory?

A Water Quality Advisory is a level of notification to advise water users of a potential chemical or physical risk. A Water Quality Advisory is used in situations where the general public health threat is modest.

Precautionary Instructions

Residents are advised to use an alternate safe source of drinking water (i.e. bottle water) for preparing baby formula for infants and young children during this time. Note, boiling water will not remove the manganese and may increase the concentration, therefore, it is not recommended.

Questions or concerns please contact Operational Services at 250-495-6213 or pubworks@osoyoos.ca
